Grade Point Average

Prior to the 2017-2018 academic year, GPA calculations were based on grades earned in each quarter and on the average of semester exams. Each course had a credit value which was multiplied by the quality points earned quarterly. The total was divided by the credits attempted in each quarter with the semester exams factoring as a fifth GPA calculation. Quality points were based on the Former Grading Scale.

Beginning with the 2017-2018 academic year, the GPA calculation is based on final grades earned in each course. GPA is reported yearly and at the end of a student's seventh semester. Final grades are awarded based on quarter and semester exam grades. Each course has a credit value which is multiplied by the quality points earned. The total is divided by the credits attempted. Quality points earned on the Former Grading Scale are combined with those earned on the Current Grading Scale to calculate the cumulative GPA.

Advanced Placement - 25 Courses
