

Long Range Fiscal and Capital Plan Revised June 13, 2022

Budgetary Effects of the COVID-19 Pandemic

March 2020 Statement: On March 11, 2020, the World Health Organization declared the novel coronavirus (COVID-19) outbreak a global pandemic. In response to that declaration, many national, state, and local governments around the globe instituted measures to prevent the spread of COVID-19. These preventative measures precipitated sudden and significant economic changes. When the 2020-2021 budget was prepared, the short-term and long-term impact on local, state, national, and the global economies was yet to be determined and predictions by analysts varied considerably. The unique, unprecedented circumstances presented significant challenges for preparing a budget and a multi-year fiscal plan. Under the circumstances, the following fundamental assumptions guided decision making: 1) the recovery period for the economic downturn would be 36 months, from March 2020 to March 2023, with "normal" economic conditions returning for the 2023-2024 fiscal year and 2) the years following the Great Recession of 2007-2009 served as a sample (but not absolute) model for predicating the budgetary effects of the economic downturn.

March 2021 Update: Immediately following the pandemic declaration, unemployment reached levels unprecedented in recent history. Economic indicators now show the unprecedented levels of unemployment were short-term; however unemployment remained high in low-wage and part-time sectors. The travel and entertainment industries were greatly affected, including the following sub-sectors: full-service and limited-service restaurants, accommodation industries, clothing and accessory retail, personal care, amusements, and air transportation. Meanwhile, other industries such as online retail and delivery services saw some expansion over the prior year.

Revenues from local sources are performed stronger than anticipated. Specifically, real estate tax collections were stronger than anticipated and Earned Income Tax receipts exceeded budget expectations. Additionally, cost savings were realized during 2020-2021, including areas such as wages (unfilled positions and employee leaves), benefits, transportation (savings when the district was in the fully-remote learning model), and staff travel. The district also received federal aid in the form of grants appropriated through federal relief measures. Federal grant monies helped defrayed the costs of pandemic mitigation measures and provided funding to address the learning loss that resulted from COVID-19 mitigation measures.

(Continued on the next page)

March 2022 Update: Over the past year, unemployment has improved in all sectors; however, new economic challenges have emerged. Nearly all labor sectors are experiencing labor shortages (i.e. a shortage of workers), which are most likely contributing to significant disruptions in global supply chains. In addition to labor market and supply chain challenges, the global economy is being impacted by increasing inflation rates, which are especially concentrated in the areas of food, energy, and durable goods. These factors have the potential to put significant upward pressure on the cost of labor and materials.

Since March 2020 the District's local revenues have performed stronger than anticipated. Some revenues such as Earned Income Taxes exhibited modified collection patterns, but these abnormalities have returned to pre-pandemic expectations. Other revenues like interest on investments and fee for service revenues declined, but are making slow progress toward recovery. Despite earlier speculation that the Commonwealth of PA would not increase state funding (similar to the period following the Great Recession of 2007-2009), state subsidies for public education have continued to increase. Federal COVID relief funds have been earmarked by the District to defray the costs necessary to mitigate the learning loss that occurred during pandemic-related school closures. Over the past year the District has continued to experience some cost savings due to pandemic restrictions; however, cost increases are anticipated during the next fiscal period due to the current labor market and supply chain challenges.

While pandemic recovery is ongoing, current and anticipated revenue and expenditure patterns suggest the recovery period (see March 2020 assumptions) for the economic downturn lasted 24 months (as opposed to 36 months as originally assumed), from March 2020 to March 2022, with "normal" conditions returning for the 2022-2023 fiscal year. Although economic factors directly related to pandemic recovery are assumed to have returned to normal, the economic concerns noted above must continue to be monitored.

<u>Introduction</u>

The purpose of this long-range fiscal and capital plan is to provide a framework to make long-range budgetary and capital expenditure plans and to understand the long-term impact of financial actions taken in the current fiscal period. Historical trends and other quantitative metrics, such as long-term labor agreements, provide a reliable foundation for assumptions; however, it is important to recognize that economic, social, political, and other climatic factors may significantly impact future budgets. This plan should be viewed as a dynamic planning tool and not as a final or absolute fiscal plan.

This plan should be updated on an annual basis as a work-in-progress to monitor financial trends of the district. Actual year-end results should be compared to projections and areas with significant variances should be evaluated in order to adjust future projections.

The Overview narrative on the following pages outlines the parameters for long-range planning in East Penn School District and is the basis for the various assumptions that have been used to calculate future projections. Furthermore, this plan includes a detailed General Fund projection and Capital Reserve Fund projections, as well as the interaction between these two funds.

The "General Fund Summary" provides a summary of the plan that is laid out similar to the Statement of Revenue, Expenditure and Changes in Fund Balances contained in the District's Single Audit Report for ease of comparison to that document.

Overview

The goal of this long-range fiscal and capital plan is to evaluate the short- and long-term fiscal health of the district to ensure the short- and long-term needs of the district can be adequately met.

The following general criteria guide the preparation of this long-range fiscal plan.

- 1. Maintain the quality of educational programs.
- 2. Expand the educational opportunities for all students, when possible.
- 3. Maintain the physical plant to avoid unnecessary and unplanned repairs and maintenance.
- 4. Provide for a 3% to 5% budgetary reserve.
- 5. Propose real estate tax increases that, when possible, are at or below the state mandated (Act 1) index.

Maintaining educational programs requires that the district continue to financially support its standards for class sizes, quality of programing, and adherence to state and federally mandated guidelines for all programs. This could require adding personnel and/or resources to accomplish those criteria.

Keeping the buildings and grounds in a safe, well-maintained condition is paramount considering the investment made when constructing buildings. Roofs, heating and air conditioning units, exterior facades, parking lots, playing fields, bleachers and any other significant maintenance needs are annual expenses that can be funded through ongoing transfers to the Capital Reserve Fund or by borrowing funds on an as-needed basis. In either scenario there is an annual outlay from the General Fund to cover those costs. The most prudent method is to directly fund the average annual cost or to the extent possible set the needed funds aside in advance. A proactive approach avoids interest and borrowing costs incurred by additional borrowing.

Maintaining a fund balance can be a difficult aspect of budgeting. During positive economic periods the balance can be more easily maintained at the level set by the school board. In uncertain economic times fund balance is often used to balance the budget; however, under these circumstances replenishing the fund balance can be difficult, requiring increased revenues and/or decreased expenditures.

There may be a conflict between these guiding criteria and sustaining real estate tax rates that are acceptable to the community. For example, it may be necessary to raise taxes up to (or even above) the Act 1 Index to maintain educational programs, maintain the physical plant, and/or provide for a budgetary reserve within the targeted range. It is important to recognize that the district may also need to take an alternative approach such as making cuts to programs to mitigate tax increases. Prioritizing the criteria and maintaining a balanced approach is essential to the success of the District.

Below is a description of the origin of the figures used in this document:

```
2016-17 Actual – Audited figures from the June 30, 2017 Single Audit Report
```

2017-18 Actual - Audited figures from the June 30, 2018 Single Audit Report

2018-19 Actual - Audited figures from the June 30, 2019 Single Audit Report

2019-20 Actual – Audited figures from the June 30, 2020 Single Audit Report

2020-21 Actual – Audited figures from the June 30, 2021 Single Audit Report

2021-22 Budget - Budget figures from the Final General Fund Budget adopted on June 14, 2021

2021-22 Estimate – Management's estimate of year-end figures (May 2022)

2022-23 Proposed – Budget figures from the Final Budget (June 2022)

2023-24 and beyond – Projections based on assumptions described in this Long Range Fiscal and Capital Plan

Assumptions

The process of preparing a long-range fiscal and capital plan involves making various assumptions that impact both revenues and expenditures. A slight variation in these assumptions can cause fund balance projections to be either high or low in any given year and consequently affect subsequent years' projections. The projections can also be affected by changes in state or federal mandates, labor contracts, and other outside influences. Therefore, attempting to accurately predict and project future revenue and expenditure trends can be difficult.

A moderately conservative approach has been used in determining the growth assumptions for both revenues and expenditures. The administration, in preparing this plan, is utilizing its knowledge of current labor contracts, historical trends, and future needs of the district. The assumptions can be assigned to each line item or in groups where the trend is consistent within that group.

Millage Impact and Revenues

The Act 1 Index is the allowable percentage increase in millage (property taxes) for each Pennsylvania school district before exceptions or voter referendum. The Index is determined annually by the Pennsylvania Department of Education (PDE) using a formula that includes such factors as the statewide average weekly wage, the federal employment cost index, and the district-specific market value/personal income aid ratio (a measure of local wealth). East Penn School District's adjusted Act 1 Index for the 2022-23 fiscal year is 4.00%. For years following the 2022-23 fiscal year, statewide Act 1 index estimates published by the Commonwealth of Pennsylvania Independent Fiscal Office in November 2021 are utilized in this plan.

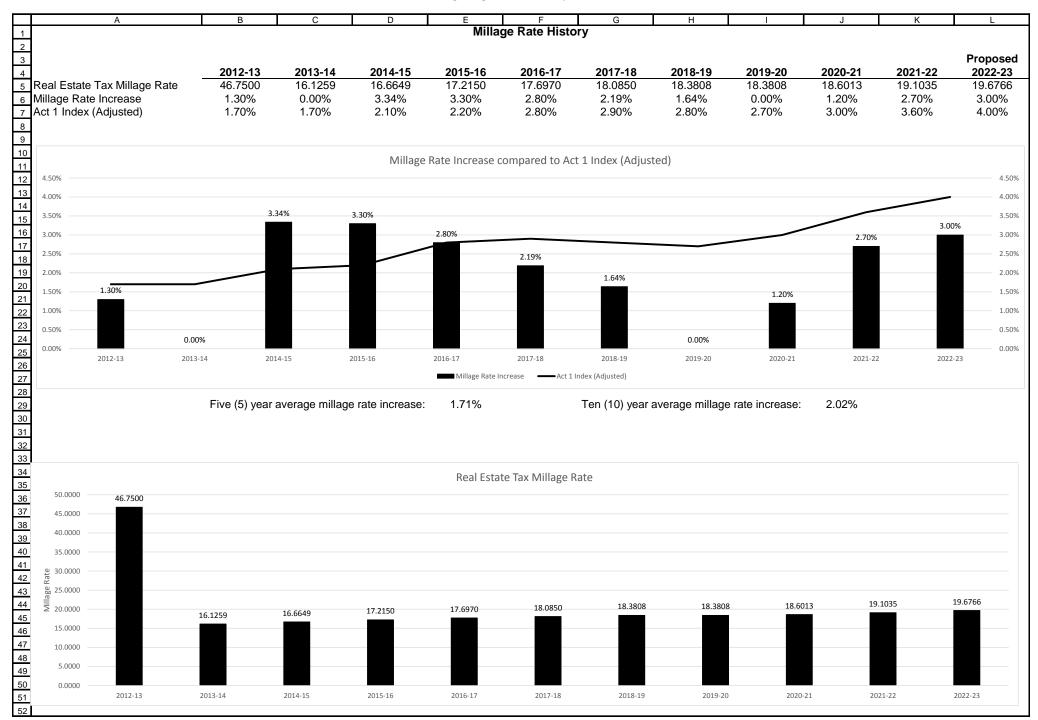

Real estate revenues are based upon the real estate tax millage rate and the taxable real estate assessments as established by the Lehigh County Office of Assessment. In recognition of continuing land development for new residential developments, the assumptions for taxable real estate assessments are maintained at the average growth rate of 1.48%. Other revenue growth assumptions are based either on management's forecast considering current environmental factors or a six (6) year historical trend analysis (adjusted for inconsistent variances).

The district's social security and retirement costs are a product of wage growth and mandated contribution rates. The state reimburses the district for approximately 50% of the cost of these two expenditures. Therefore, these two items do not follow the state subsidy growth projections.

During the 2021-2022 fiscal year the District received supplemental federal grant monies from the Coronavirus Response and Relief Supplemental Appropriations Act (CRRSA) and the American Rescue Plan (ARP). The monies were used to address the learning loss that resulted from the COVID-19 pandemic through a variety of supplemental student programs and interventions. In addition the District committed funds to continue to address the learning loss in future years.

The section "Revenue from 2022-2023 District Priorities" near the bottom of pages 11 and 12 represents Social Security and Retirement Reimbursement received from the Commonwealth of PA on employee wages included in the District Priorities costs. This item is included as a revenue line-item, so the Long Range Fiscal and Capital Plan total revenues correspond to the PDE-2028, General Fund Budget.

Expenditures

Cost assumptions for all expenditure increases except salaries, benefits, and debt service are included on the assumptions page. Salary, benefits, and debt service growth assumptions are located on their respective pages of this long-term fiscal and capital plan. Separate schedules have been prepared for instructional and non-instructional costs. Those schedules are broken into categories (referred to as Functions) as determined by Pennsylvania Department of Education accounting guidelines. Areas that grow more or less than the norm are calculated independently of the general costs and are labeled and calculated as per each line item. As with the rest of this plan, there is control over what percentage increases are applied to each area in each year. This gives a large amount of flexibility and control over the assumptions for each area of spending.

Salary assumptions are shown on the Salaries page and include costs currently known (per labor contracts previously approved by the Board). The East Penn Education Association Contract (Instruction) extends through the 2023-24 year, Act 93 Administrative Compensation Plan (Administration) through 2023-24, Teamsters Contract (Custodial/Maintenance) through 2022-23, and the East Penn Support Professional Contract (Support Staff) expires on June 30, 2022.

Benefit assumptions are based on either known indexed percentages such as the social security (FICA) rate (7.65%) or the Public School Employees' Retirement System's (PSERS) contribution rate as predicted on the PSERS website. The anticipated healthcare increase is based on historical trend and is set at 7.43% per year.

As noted earlier, assumptions for department and program budgets are shown on the assumptions page with many areas being lumped into general categories such as instructional and non-instructional. Areas such as special education, charter schools, transportation, and tuitions to other institutions are segregated to recognize the fact that those costs are often not at the discretion of the district. If any other areas show growth at a level not following the trends of the general categories they can also be isolated and have a growth assumption that would follow that particular area.

Debt service is shown separately because it has a specific schedule of payments and does not follow a specific pattern or trend. It is important to note that as of July 1, 2018 the District converted all debt obligations to fixed-rate debt.

The final area of expenditures are District Priorities, which are initiated by the Superintendent. The list of district priorities is found in the "Supplement Information" section located at the end of this plan. The costs are separated by recurring or one-time costs. The recurring costs are increased by an assumed factor shown on the Assumptions page, while the one-time costs are for one-time purchases occurring only in the year shown.

In addition to the district priorities noted above, the 2022-2023 budget includes expenditures for a variety of supplemental student programs and interventions to address the learning loss that resulted from the COVID-19 pandemic. Monies for these programs were set aside using a committed fund balance originating during the 2021-2022 fiscal year. The supplemental student programs and interventions are anticipated to continue until the monies set aside for this purpose are exhausted.

Capital Projects Plan

The capital projects plan outlines major capital repairs, maintenance, and improvements to district buildings and grounds. This plan was greatly enhanced following a district-wide facilities study completed by KCBA Architects in February 2022. Annually this plan is updated by the Director of Facilities with input from district management. Management evaluates the lifecycle and current condition of major building systems and equipment to estimate a date of refurbishment or replacement. In addition, management frequently seeks the advice of external experts (e.g. architects, engineers, technicians, installers, etc.) to assist with establishing anticipated end-of-life and estimated project costs. Conditions are then monitored to identify rapid deterioration or extended longevity that may affect the anticipated project date, thus projects may be advanced or delayed from the originally anticipated date.

An important part of long range planning is monitoring the age and capacity of school buildings. East Penn School District currently operates seven (7) elementary schools, two (2) middle schools and one (1) high school. An inventory of the District's school buildings follows:

Building	Original Construction <u>Date</u>	Renovations or Additions	Grades <u>Housed</u>	Student <u>Capacity</u>	Student <u>Enrollment</u>
ELEMENTARY SCHOOLS:					
Alburtis Elementary School	2004		K-5	525	334
Jefferson Elementary School	1999		K-5	300	261
Lincoln Elementary School	1928	1960, 1994	K-5	450	361
Macungie Elementary School	1989		K-5	625	486
Shoemaker Elementary School	1970	2005	K-5	775	578
Wescosville Elementary School	1966	1997	K-5	700	487
Willow Lane Elementary School	2009		K-5	825	613
MIDDLE SCHOOLS:					
Lower Macungie Middle School	1999		6-8	1,192	1,066
Howard A. Eyer Middle School	1973	2007	6-8	1,350	859
HIGH SCHOOL:					
Emmaus High School	1954	1958, 1964, 1999, 2004	9-12	2,441	2,774
DISTRICT TOTAL:				9,183	7,819

Notes:

Student capacity is based on PDE calculations completed at the time of construction or most recent renovation. Student enrollment is the October 1, 2021 enrollment reported to PDE.

A portion of the Emmaus High School student population attends Lehigh Career & Technical Institute.

Summary of General and Capital Reserve Funds

This spreadsheet provides a summarized view of the General Fund and Capital Reserve Fund. The purpose of this summary is to show the interaction of the two funds as the contributions required by the Capital Reserve Fund are provided via a transfer from the General Fund. It also shows the change in fund balances for each fund in each year of the plan.

Without the transfer of funds, a borrowing via a bond issue or bank loan would be required to fund the capital projects, causing the district to incur costs for fees associated with borrowing.

In recognition of an aging physical infrastructure, the District is actively planning for future capital needs. Near the end of the 2018-19 fiscal year \$3 million of budget surplus was transferred from the General Fund to the Capital Reserve Fund as permitted by the Commonwealth of PA Municipal Code Section 1431 and a similar transfer of \$10 million was completed near the end of the 2020-21 fiscal year. Another transfer of \$6.0 million is recommended for the end of the 2021-22 fiscal year. The transfer of funds aims to preserve the funds for a "down-payment" on future capital projects; as well as provide a contingency for cost increases in capital projects scheduled for future years.

It is proposed that the contribution to capital reserve will increase by \$696,000 for 2022-23, which corresponds to the budgetary savings from reduced debt service expenses of approximately \$696,500. In 2023-24 the contribution to capital reserve will increase an additional \$1,468,900, corresponding to the budgetary savings from an additional debt service reduction. Then in 2024-25 and 2025-26 the contribution to capital reserve will increase by and additional \$223,100 and \$4,083,500 respectively. This is a strategy to:

- 1) Increase the amount placed in the capital reserve fund for scheduled capital expenditures and infrastructure upkeep.
- 2) Avoid redirecting monies previously allocated for debt payment and infrastructure needs to be used for general operating expenditures (this was done in 2020-2021 due to the extenuating circumstances caused by COVID-19).
- 3) Prepare for future debt financing needs, by preserving capacity for new/additional debt payments in the general operating budget.

Evaluation of Combined Fund Balance and Capital Reserve Contribution Targets

The section labeled Evaluation of Combined Fund Balance Target calculates two (2) months of General Fund expenditures, which is also referred to as the Total Fund Balance Target. According to the Government Finance Officers Association (GFOA), general-purpose governments (including school districts) should maintain a fund balance of no less than two months of general fund operating expenditures. For purposes of this comparison, the ending balances of the general fund and capital reserve fund are combined. The combined ending balance total is subtracted from the Total Fund Balance Target, offering an indication of the excess or deficit when compared to the target.

This comparison is merely provided as a measurement tool to evaluate strengthening or weakening of the districts reserves over time. Furthermore the Total Fund Balance Target is a benchmark. A deficit Total Fund Balance to Total Ending Fund Balance should not be looked upon negatively, as many other environmental and economic factors must be considered.

The section labeled Evaluation of the Annual Capital Reserve Contribution Target should assist in establishing an annual appropriation and contribution from the general fund to the capital reserve fund. Annually setting aside two (2%) percent of the property insurance physical plant appraisal value, assumes funds equal to the value of the physical plant are set aside over the equivalent of a 50 year period to be used of for ongoing and future capital expenditure needs.

Scenario Analysis of Various Tax Rate Increases

The following analysis demonstrates the long-term impact of various real estate tax increase scenarios. Scenario 1 demonstrates the impact of a 0% real estate tax increase for 2022-23, Scenario 2 demonstrates 3.00% real estate tax increase for 2022-23, and Scenario 3 demonstrates 4.0% real estate tax increase for 2021-22 (which is East Penn School District's Act 1 Index for that year).

Within each of the scenarios described above, there are three (3) different iterations, which are labeled "a" through "c". Iteration "a" demonstrates the impact of a 0% real estate tax increase for all years subsequent to 2021-22. Iteration "b" demonstrates the tax increase average percentage required for all years subsequent to 2021-22 to achieve a 5% fund balance in 2025-26. Finally, iteration "c" demonstrates the impact of applying the maximum anticipated increase under Act 1 in years subsequent to 2022-23.

When the scenarios and iterations are combined, nine (9) outcomes are generated. While all of the detailed calculations have been provided, it is suggested that the "Act 1 Index Utilized" and "Ending Fund Balance" rows be examined to better understand the impact of the various scenario and iteration combinations.

Supplemental Information

The following supplemental tables are included to provide additional financial data:

Real Estate Tax Impact of Various Percentage Tax Increases and Assessed Values for 2022-23 Budget

This spreadsheet shows the tax impact at millage increases ranging from 2.00% to 4.00% and at real estate assessed values from \$100,000 to \$660,000 including the average residential assessment of \$213,488.

• Real Estate Tax Impact of Long-Range Fiscal and Capital Plan

This spreadsheet shows the real estate tax impact of the long-range plan at millage increases (see the annual rates on the Fund Balance and Millage Impact Calculations sheet) on homes assessed at values ranging from \$100,000 to \$660,000 for each of the years in the plan.

Current and Proposed Budget Analysis

This spreadsheet compares the 2021-22 budget and estimates with the proposed 2022-23 budget.

Long Range Technology Plan

Anticipated technology expenditures 2021-22 through 2024-25
