# A Planned Course Statement <br> For <br> Algebra I 

Course \# 306
Department: Mathematics

Grades) 9-12

Length of Period (mins.) 4141

Periods per Cycle: 6 $\qquad$
Type of Offering: $\qquad$ required Length of Course (yrs.) $\qquad$ 1
$\qquad$ elective

Credit: 1
Adopted: 6/28/10

Developed by: Leiby, Laura Lesko, Kelly
Porzuczek, Teresa Ritter, Christopher

## Course Title: Algebra I

Description: The content of this course includes real numbers, solving equations, and inequalities, linear graphs, systems of linear equations, exponents, factoring, rational expressions and equations, relations, functions, probability, quadratic equations and a 2 D shape introduction.

## Goals:

- To introduce students to the fundamental concepts of Algebra necessary to continue further studies in higher mathematics.

## Requirements:

- Scientific Calculator
- Prerequisite: Pre-Algebra B or Pre-Algebra

## Text:

Charles, R.I., Hall, B., Kennedy, \& Hall, B. (2011). Prentice Hall Algebra I, Boston, MA: Pearson

## Key to Levels of Achievement (Listed with each learning objective)

| Awareness (A): | Students are introduced to concepts, forms, and patterns. |
| :--- | :--- |
| Learning (L): | Students are involved in a sequence of steps and practice activities <br> which involved further development and allow evaluation of process. |
| Understanding (U): | Students demonstrate ability to apply acquired concepts and skills to <br> individual assignments and projects on an independent level. |
| Reinforcement (R): | Students maintain and broaden understanding of concepts and skills <br> to accomplish tasks at a greater level of sophistication. |

## Course Objectives

Page 1

| Unit | Num | Objective | Level | Content | Evaluation | Standard |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| I. Introduction to Algebra | 1 | Students will write and evaluate algebraic expressions using the properties of numbers in algebra. | U | - Identify, describe and explain patterns <br> - Substitute and simplify algebraic expressions <br> - Determine the appropriate order for simplifying an expression and explain why the order works (order of operations) <br> - Use commutative, associative, identity and distributive properties to simplify expressions <br> - Evaluate expressions, equations, and formulas <br> - Translate words into algebraic expressions and equations | - Homework <br> - Tests <br> - Quizzes <br> - Independent Work <br> - Group Work | 2.1.8.B 2.1.11.A 2.2.8.A 2.3.8.B 2.5.11.C 2.8.8.C |
| II. Real Numbers | 2 | Students will identify number sets. Students will compare, order and evaluate numbers within those sets. Students will identify patterns in sets of real numbers. | U | - Identify, describe and explain patterns <br> - Distinguish between rational and irrational numbers. <br> - Recognize and define the number sets - real, rational, irrational, integers, and whole numbers <br> - Compare real numbers using $<, \leq$, $\geq$, > or $\neq$ <br> - Find absolute value, square root, opposites, and reciprocals <br> - Optional remediation: perform arithmetic with positive and negative numbers | - Homework <br> - Tests <br> - Quizzes <br> - Independent Work <br> - Group Work | 2.1.8.A 2.1.8.B 2.1.8.C 2.1.8.F 2.1.11.A 2.2.8.B 2.2.8.C 2.4.8.A 2.5.11.C 2.8.8.A 2.8.11.A 2.11.8.C |

## Course Objectives

| Unit | Num | Objective | Level | Content | Evaluation | Standard |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| III. Solving Equations | 3 | Students will write and solve equations, using the properties of equality. | U | - Describe the relationship between an equation and its solution <br> - Use addition, subtraction, multiplication and division equality properties to solve onestep equations <br> - Solve two-step equations using deductive reasoning (justify steps using properties of equality) <br> - Solve multi-step equations using deductive reasoning (justify steps using properties of equality) <br> - Solve equations with variables on both sides of equal sign using deductive reasoning (justify steps using properties of equality) <br> - Translate sentences into algebraic equations and solve | - Homework <br> - Tests <br> - Quizzes <br> - Independent Work <br> - Group Work | 2.1.8.G 2.1.11.A 2.2.8.A 2.4.8.C 2.4.11.A 2.5.8.C 2.5.11.A 2.5.11.C 2.8.8.B 2.8.8.C 2.8.8.E 2.8.8.J 2.8.11.A 2.8.11.D 2.8.11.N 2.8.11.O |
| IV. Inequalities | 4 | Students will write one-variable inequalities, graph one-variable inequalities and solve onevariable inequalities, using the properties of inequality. | U | - Describe and graph solutions of an inequalities <br> - Use addition, subtraction, multiplication and division properties to solve one-step inequalities <br> - Solve two-step inequalities using deductive reasoning (justify steps using properties of inequalities) <br> - $\quad$ Solve multi-step inequalities using deductive reasoning (justify steps using properties of inequalities) <br> - Solve inequalities with variables on both sides of inequality signs using deductive reasoning (justify steps using properties of inequalities) <br> - Translate sentences into algebraic inequalities and solve <br> - Optional enrichment: compound inequalities <br> - Optional enrichment: absolute value inequalities | - Homework <br> - Tests <br> - Quizzes <br> - Independent Work <br> - Group Work | $\begin{aligned} & \hline \text { 2.1.8.F } \\ & \text { 2.1.11.A } \\ & \text { 2.4.11.A } \\ & \text { 2.5.8.C } \\ & \text { 2.5.11.C } \\ & \text { 2.8.8.C } \\ & \text { 2.8.8.E } \\ & \text { 2.8.11.D } \end{aligned}$ |

| Unit | Num | Objective | Level | Content | Evaluation | Standard |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| V. Graph of Linear Equations in twovariables | 5 | Students will graph linear equations in two-variables. Students will write the equation of a line. | U | - Determine whether a relationship is a function based on its description or graph <br> - Find the domain and range of a function <br> - Determine whether a point is a solution to an equation <br> - Identify points that are solutions to an equation using a graph <br> - Graph a linear equation using a tchart, slope-intercept form, pointslope form, and standard form <br> - Graph horizontal and vertical lines <br> - Find the slope of a line (given two points, given an equation) <br> - Describe slope (positive, negative, zero, undefined) <br> - Find the slope and y-intercept of a linear equation <br> - Write a linear equation given slope and one point, given a graph, and given two points <br> - Describe the correlation between variables for graphs (including scatter plots) <br> - Find an equation of a line of best fit that models given data; use the model to make estimates <br> - Solve problems using linear models including rate of change <br> - Find the distance between twopoints using the distance formula | - Homework <br> - Tests <br> - Quizzes <br> - Independent Work <br> - Group Work | 2.1.11.A 2.2.11.C 2.4.11.E 2.5.8.C 2.5.11.A 2.5.11.B 2.5.11.C 2.6.8.C 2.8.8.G 2.8.8.H 2.8.11.A 2.8.11.D 2.8.11.J |

## Course Objectives

Page 4

| Unit | Num | Objective | Level | Content | Evaluation | Standard |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| VI. Graph of Inequalities in TwoVariables | 6 | Students will graph inequalities with two-variables. Student will generate solutions for a system of linear inequalities using graphing. | U | - Graph an inequality in slopeintercept form <br> - Determine whether an ordered pair is a solution of the inequality <br> - Match a given inequality and its graph <br> - Graph two inequalities on the coordinate plane and shade the solutions of the graph. <br> - Optional enrichment: Write the linear inequality that describes the graph | - Homework <br> - Tests <br> - Quizzes <br> - Independent Work <br> - Group Work | $\begin{aligned} & \hline \text { 2.1.11.A } \\ & \text { 2.5.8.C } \\ & \text { 2.5.11.C } \\ & \text { 2.8.8.C } \\ & \text { 2.8.11.D } \\ & \text { 2.8.11.G } \\ & \text { 2.8.11.J } \\ & \text { 2.8.11.K } \\ & \text { 2.8.11.L } \\ & \text { 2.8.11.M } \end{aligned}$ |
| VII. Systems of Equations | 7 | Students will solve systems of linear equations. | U | - Determine whether an ordered pair is a solution of a system of equations <br> - Find and interpret the solution of a system of equations using graphing, substitution <br> - Determine whether a system of equations has one, many or no solutions (classify as Consistent Dependent, Consistent Independent, or Inconsistent) <br> - Solve authentic problems using linear systems models | - Homework <br> - Tests <br> - Quizzes <br> - Independent Work <br> - Group Work | 2.1.11.A 2.2.8.A 2.2.11.A 2.4.11.E 2.5.8.C 2.5.8.D 2.5.11.A 2.5.11.C 2.8.8.C 2.8.11.D 2.8.11.F 2.8.11.G 2.8.11.N |
| VIII. Exponents | 8 | Students will use the rules of exponents to simplify expressions. | U | - Multiply and divide numbers and variables in exponential form <br> - Simplify negative and zero exponents <br> - Find the power of a power and the power of a product of a product or a quotient <br> - Write numbers using scientific notation | - Homework <br> - Tests <br> - Quizzes <br> - Independent Work <br> - Group Work | $\begin{aligned} & \text { 2.1.8.A } \\ & \text { 2.1.8.B } \\ & \text { 2.1.11.A } \\ & \text { 2.5.8.C } \\ & \text { 2.5.11.C } \\ & \text { 2.8.8.B } \end{aligned}$ |

| Unit | Num | Objective | Level | Content | Evaluation | Standard |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| IX. Polynomials | 9 | Students will add, subtract, and multiply polynomials. | U | - Recognize and provide examples of polynomials <br> - Determine whether polynomials in different forms are equivalent <br> - Write polynomials in descending order <br> - Simplify a polynomial by collecting like terms <br> - Classify polynomials by terms and degree <br> - Add and subtract polynomials (including fractions with LCM for common denominator $\frac{1}{x}+\frac{1}{x^{2}}$ ) <br> - Multiply polynomials: FOIL, expansion box, distribution, vertical <br> - Use patterns to determine rules for special products | - Homework <br> - Tests <br> - Quizzes <br> - Independent Work <br> - Group Work | $\begin{aligned} & \hline 2.1 .8 . \mathrm{E} \\ & \text { 2.1.11.A } \\ & \text { 2.2.8.A } \\ & \text { 2.5.8.C } \\ & \text { 2.5.11.C } \end{aligned}$ |
| X. Factoring | 10 | Students will use general strategies to factor polynomials. Students will solve polynomial equations by factoring. | U | - Factor a polynomial by identifying a common factor (GCF) <br> - Recognize the pattern for a difference of two squares and factor <br> - Factor $\mathrm{ax}^{2}+\mathrm{bx}+\mathrm{c}$ where $\mathrm{a}=1$ <br> - Factor by grouping <br> - Factor $\mathrm{ax}^{2}+\mathrm{bx}+\mathrm{c}$ where $\mathrm{a}>1$ <br> - Solve equations using zero product property and square roots <br> - Application: Pythagorean Theorem | - Homework <br> - Tests <br> - Quizzes <br> - Independent Work <br> - Group Work | $\begin{aligned} & \hline \text { 2.1.8.A } \\ & \text { 2.1.11.A } \\ & \text { 2.2.8.A } \\ & \text { 2.2.11.A } \\ & \text { 2.4.11.E } \\ & \text { 2.5.8.C } \\ & \text { 2.5.11.A } \\ & \text { 2.5.11.C } \end{aligned}$ |
| XI. Quadratics | 11 | Students will explore graphs of quadratic equations. | U | - Graph a quadratic function in the form $y=a x^{2}$ and $y=a x^{2}+c$ <br> - Describe the graph of a quadratic function: minimum, maximum, vertex, axis of symmetry <br> - Optional enrichment: Graph y = $a x^{2}+b x+c$ | - Homework <br> - Tests <br> - Quizzes <br> - Independent Work <br> - Group Work | 2.1.11.A 2.5.8.C 2.5.11.C 2.8.8.B 2.8.11.E 2.8.11.J 2.8.11.N |

| XII. Probability | 12 | Students will be able to compute probabilities. Students will design and conduct an experiment using random sampling. Students will calculate the measure of central tendencies. | U | - Calculate probabilities for independent, dependent and compound events <br> - Design and conduct an experiment using random sampling <br> - Draw conclusions from experimental data <br> - Calculate range and interquartiles <br> - Compute the mean, median, and mode for a set of data <br> - Determine which measure of central tendency is appropriate for authentic data sets | - Homework <br> - Tests <br> - Quizzes <br> - Independent Work <br> - Group Work | $\begin{array}{\|l} \hline 2.1 .11 . \mathrm{A} \\ \text { 2.2.8.A } \\ \text { 2.2.11.A } \\ \text { 2.2.11.C } \\ \text { 2.4.8.F } \\ \text { 2.4.11.E } \\ \text { 2.5.8.C } \\ \text { 2.5.8.D } \\ \text { 2.5.11.A } \\ \text { 2.5.11.B } \\ \text { 2.5.11.C } \\ \text { 2.5.11.D } \\ \text { 2.6.8.A } \\ \text { 2.6.8.C } \\ \text { 2.6.8.D } \\ \text { 2.6.11.H } \\ \text { 2.7.8.B } \\ \text { 2.7.8.C } \\ \text { 2.7.8.D } \\ \text { 2.7.8.E } \\ \text { 2.7.11.C } \\ \text { 2.7.11.D } \\ \text { 2.7.11.E } \\ \text { 2.8.11.M } \\ \text { 2.8.11.Q } \\ \text { 2.8.11.R } \end{array}$ |
| XIII. Optional enrichment: 2-D Shapes Intro | 13 | Students will identify properties of 2D shapes. | A | - Calculate area and perimeter of 2D figures: square, rectangle, triangle <br> - Use coordinate plane to find distance between vertices of 2D figures <br> - Calculate geometric probability | - Homework <br> - Tests <br> - Quizzes <br> - Independent Work <br> - Group Work | $\begin{array}{\|l} \hline \text { 2.1.11.A } \\ \text { 2.3.8.A } \\ \text { 2.3.8.E } \\ \text { 2.5.8.C } \\ \text { 2.5.11.C } \\ \text { 2.8.8.J } \\ \text { 2.10.8.B } \end{array}$ |
